

GridFAST™

Customer Fact Sheet

Introducing GridFAST: Your central portal for collaboration with utilities on EV charging projects

We are pleased to announce the soft launch of GridFAST, an innovative platform designed to help streamline and accelerate EV infrastructure energization across the industry.

What is GridFAST?

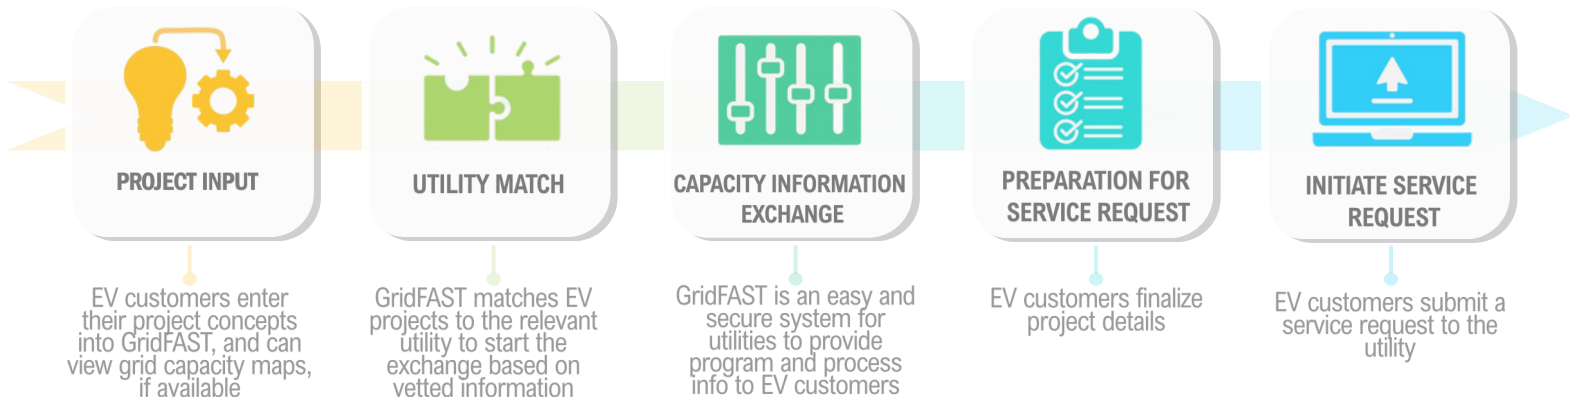

GridFAST was created as a cross-industry tool to enhance the collaboration between you and your utility partners, facilitating early and efficient engagement.

GridFAST is a platform that connects EV customers with the right utility personnel, and a channel for secure data exchange. The platform offers tailored advice, making your EV projects smoother and more efficient.

GridFAST helps move your project forward by:

- Efficiently connecting you with the appropriate utility contact
- Delivering expertise and hands-on service to advance electrification projects
- Ensuring you control how your data are used and who can see it
- Serving as a central repository for you to access EV program information from U.S. utilities

Here is how GridFAST works at each stage

EV Infrastructure Energization: Why it is imperative to partner early with utilities

Good things happen when you partner early with a utility. Using GridFAST can help deliver benefits:

- Optimized project siting decisions
- On-time and on-budget projects
- Progress towards your organizations' decarbonization and electrification goals

GridFAST is FREE for U.S. businesses and other organizations with EV charging projects
